The *kid's camps* went over very well with at least 2 dozen participants. They were enjoyed by all who attended, and all the feedback comments were very favorable. It is definitely an event that will be carried forward.

The centre was visited by various people through out Alberta, including visitors from Germany, Boise Idaho, Tulsa Oklahoma, British Columbia, and Saskatchewan. Also 7 school tours were held in May and June.

On August 13, 2010, several members from Alberta Education (including people from the Learning Network and The Critical Thinking Consortium) spent an entire day in Bodo. During their day, they visited the Bodo Site and learned about the history and future of the archaeological research at the site. This day was a huge success and everyone had a great time, despite the gloomy and rainy weather. Currently, Bodo continues to work with this group of professionals to develop Critical Challenges that focus on archaeology and the Bodo Site. These challenges will be incorporated into the new Social Studies Curriculums for Grades 4, 5 & 7. On August 13<sup>th</sup>, a new promotional video was also shot at the Bodo Archaeological Center and Site, and representatives from Travel Alberta also participated in the day's events.

Next year finds the BAS celebrating 10 years of OPEN houses on July 1. We are having a big day, including a reunion with all past students, TA's & staff who participated in the University digs. If you are interested in helping or have a celebration idea, please call us.
